

MSR-INNOVATIONS GMBH

Functional Description

Energy Management System (EMS)

Project Information

PROJECT	Sample Project — Self-Sufficient Energy System
CLIENT	Sample Client GmbH, 1 Sample Street, 12345 Sample City
CONTRACTOR	MSR-Innovations GmbH
AUTHOR	Max Mustermann
DATE	01.01.2026
REVISION	Rev. 1.2 (Sample)

Disclosure of the Document

Disclosure of this document and its contents is permitted only with the consent of **MSR-Innovations GmbH**. The document and its contents are handed over in confidence in agreement with the contracting party, unless separate handling has been agreed.

1 Note on this Sample Document

This document is an anonymised sample document. It shows the cover page, the confidentiality page and the complete table of contents of the original document and ends at this point. The chapters containing the technical content are not part of this sample document.

This document was prepared for MSR-Innovations GmbH. Customer-specific documents are used or prepared for each company.

All project, company, person and location details as well as all dates have been replaced by sample details. The only company name mentioned in the document is MSR-Innovations GmbH as author. Structure, chapter sequence, page numbers and scope correspond unchanged to the original.

Characteristic	Detail
Document type	Functional Description
Trade / Discipline	Building automation, energy management system (EMS), hydrogen energy technology
Service phase	LPH 5 — Execution Planning
Page count of the original	32 pages
Main chapters	8
Total index entries	62 (including index pages)
Outline depth	5 levels
Revision	Rev. 1.2 (Sample)
Language	German

Table 1: Profile of the original document.

2 Contents Overview of the Original Document

The overview below reproduces the complete table of contents of the original document with all chapter titles and the corresponding page numbers.

Chapter	Page
Disclosure of the Document	2
Table of Contents	3
1 General Description	6
1.1 Primary Energy Generation	6
1.2 Energy Storage and Conversion	6
1.3 Self-Sufficiency Target	6
1.4 Installation Location and Spatial Arrangement	6
2 Project Description	7
2.1 System Structure	7
2.1.1 Generator – Photovoltaic System and PV Inverter	7
2.1.2 Consumers	7
2.1.3 Internal Grid	7
2.1.4 Grid Connection (Emergency)	8
2.1.5 Battery System	8
2.1.6 Electrolyser	8
2.1.7 Hydrogen Storage	9
2.1.8 Compressor System	10
2.1.9 Fuel Cell	10
2.1.10 Heat Extraction System	12
2.2 Operating Mode of the Overall System	13
3 EMS Functions	14
3.1 Electrical Energy Management	14
3.1.1 Control Principle	14
3.1.2 Priority Sequences – Energy Surplus	14

3.1.3 Priority Sequences – Energy Deficit	15
3.1.4 Battery System Automatic Mode	15
3.2 Hydrogen System	15
3.2.1 Electrolyser Automatic Mode	15
3.2.2 Hydrogen Storage Automatic Mode	16
3.2.3 Compressor System Automatic Mode	17
3.2.4 Fuel Cell Automatic Mode	18
3.3 Heat Management	19
3.3.1 Fuel Cell Heat Extraction	19
3.3.1.1 Operating Case 1 – Normal Operation (Buffer Tank Charging)	19
3.3.1.2 Operating Case 2 – Buffer Tank Full (Emergency Cooling)	20
3.3.2 Buffer Tank Immersion Heater Control	20
3.3.2.1 Operating Case 1 – Temperature-Controlled Operation (Heat Demand)	20
3.3.2.2 Operating Case 2 – PV Surplus Operation	20
3.3.2.2.1 Immersion Heater 1 Automatic Mode	21
3.3.2.2.2 Immersion Heater 2 Automatic Mode	21
3.3.2.2.3 Immersion Heater 3 Automatic Mode	21
3.3.2.3 Power Limitation during Simultaneous FC Operation	22
3.4 Ventilation Control	22
3.4.1 FC Operating Ventilation	22
3.4.2 Emergency Ventilation Fan, Room “Technik 1”	23
3.4.3 Emergency Ventilation Fan, Compressor Container	23
3.5 Safety-Related EMS Functions	24
3.5.1 Gas Detection System	24
3.5.2 Gas Alarm Levels and EMS Response	24
3.5.3 Standstill Monitoring and Forced Start	24
4 Measured Value Acquisition	25
4.1 Electrical Measured Values	25
4.2 Heat Measured Values	25

4.3 Hydrogen Measured Values	26
4.4 Safety Measured Values	26
4.5 Weather Station	27
5 Visualisation / HMI	28
6 Alarming	29
7 Maintenance	30
8 Communication and Data Interfaces	31
8.1 Communication Overview	31
8.2 Metering Scheme	32
